HYDRATION

If you're looking for ways to improve your hydration and get additional nutrients from your water intake, mineral water might be the choice for you!

Sugary drinks can lead to inflammation and health issues, and too much caffeine can affect your sleeping.

Thanks to its natural mineral composition, Topo Chico can be used for quenching thirst, assisting in the digestive process, and it's a great hangover remedy.

Quality water is self-care!

SPARKLING MINERAL WATER
Est. 1895
Cerro del Topo Chico
MEXICO

RECIPES

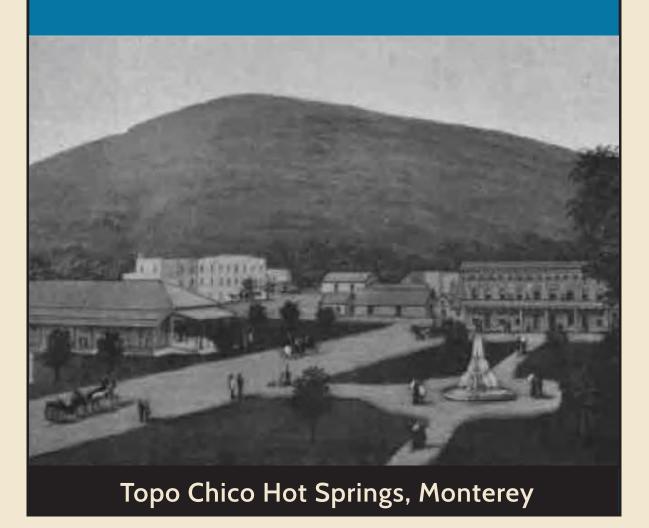

LOCATION

Sourced from the springs at Cerro del Topo Chico near Monterrey, Mexico. Since 1895, Topo Chico has been drawn from these "enchanted" underground springs, flowing from an inactive volcano shaped like a mole. The name Topo Chico (little mole) comes from the Cerro del Topo Chico mountain. The limestone quarries of northern Mexico provide the waters' mineral properties.

Unfortunately, if you were hoping to make the pilgrimage to Cerro del Silla to bathe in the mysterious Topo Chico waters like an Aztec princess, you're out of luck. Topo Chico restricts access to the springs to ensure the continued integrity of the unique blend of minerals and purity of the waters.

THE AZTEC PRINCESS

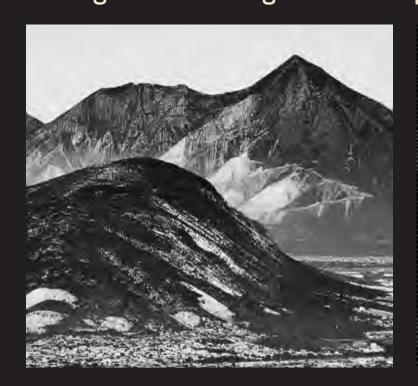

This legend speaks of the virtues of the water that since 1895 has given its name to one of the most important drinks in all of Mexico: Topo Chico Mineral Water.

There was a beautiful Aztec princess who suffered a terrible and mysterious illness. A disease so strange that no doctors of her father, Moctezuma I Ilhuicamina, successor in 1440 of the King Itzcoatl, had been able to cure. When doctors couldn't find a cure, a priest suggested the healing waters of a mystical spring in Northern Mexico.

Desperate, the King turned to the older priests in the kingdom to find a cure for his beautiful daughter. They told him that according to the timeless stories of travelers, in a far away northern land, there were strange and hidden waters which flowed at high temperatures. Waters in which one only needed to bathe in or drink from to regain vigor, joy, strength, and refreshment.

Encouraged by this news, Moctezuma ordered an immediate expedition to take his daughter to this amazing place. After traveling long and rugged roads, the Princess and her expedition reached a fertile valley flanked by mountains. To the east, they saw a mountain with the form of woman's face (now Cerro de la Silla) and a mole-shaped hill, from whose slopes flowed the prodigal waters.

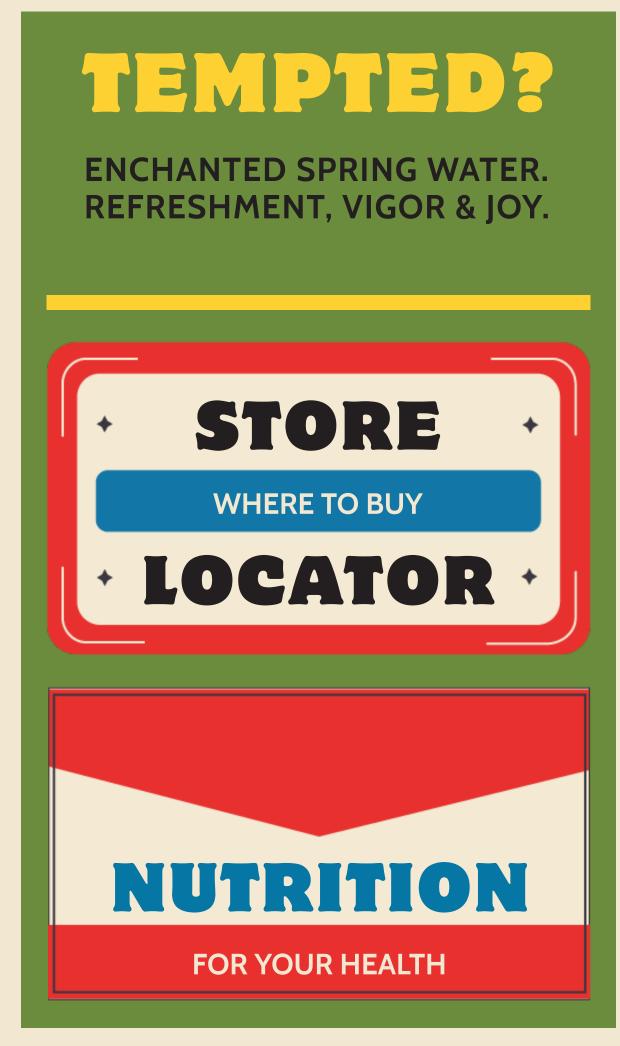

After spending some time there, taking baths and drinking from the water, the daughter of Moctezuma, his priests, and chiefs returned to the Anahuac lands optimistic, strong, happy, and refreshed. The news about the Princess's recovery spread throughout the kingdom and has passed from generation to generation up until modern times.

MINERALS

The minerals in Topo Chico help give the water its distinctive and unique taste. Mineral water can help with health concerns, including bone health, digestion, blood pressure, heart health, and muscle function.

While these minerals can support your body in the follow ways when consumed in appropriate amounts, Topo Chico does not contain sufficient mineral content on its own to meet those levels. See FDA nutrition guidelines for more information.

CALCIUM an important nutrient and a major component of bones and teeth

GHLORIDE in association with sodium, helps to maintain water balance in the body.

MAGNESIUM an important nutrient and contributes to electrolyte balance.

POTASSIUM an important nutrient to help support healthy blood pressure.

SODIUM an important nutrient to help support water balance in the body.

SULFATE is produced in the body and it can also be obtained through the diet. Sulfate is involved in different physiological processes, including on the elimination of exogenous compounds.
